

This property is a great one for those that love the properties with character offering plenty space! It is very well located in the center of the beautiful Panormon and it is suitable either for private or business use! There is a part that includes some ruins where 2 floors can be built, an other part that includes the building rights of the first floor (the ground floor belongs to another owner) and also a quite new stone built area of 25 sq.m! The property offers some very special traditional features like the entrance! It is located near to the beach, taverns, shops, etc...
