Tompazi 20, Rethymno

LAND INFORMATION:

Lot Size : 3359

CONVENIENCE:**General Amenities:** Mountain view,

Buildable plot of land for sale in Achlades Rethymno. It is a plot of land of 3359.42 m2 outside the settlement of Achlade, the municipal district of Achlade, the municipality of Mylopotamos, the prefecture of Rethymno. The property is, by way of exception, buildable as it exists as it was before 10/17/1978.

It offers nice mountain views and it is located only 5kms from the beach and the popular Panormo, and 20 kms from Rethymno city. The closest town is Perama where everything can be found such as small hospital, pharmacies, all shops, banks, etc...

The village of Achlades is located in the center of Crete, in the prefecture of Rethymnon and at a distance of almost 28 kilometers from the town of the same name.

Achlade's strategic location allows easy access to every corner of the prefecture, with beautiful sandy beaches just minutes away, and despite being a very small village, there are many treasures to visit and admire.
